

Energy

Last Modified on 11/13/2024 9:18 am CST

Energy Tanks and tickets associated with those Tanks can be viewed from the *Energy* menu option in Grower360.

A listing of active Energy Tanks displays the Tank name or serial number, *Last Del Product*, *Tank Size*, *Last Fill Amt*, *Last Fill* date, *Tank %*, and *As of* date for the *Tank %* reading.

Note: Tank Monitor Readings display in the *Tank %* area if applicable.

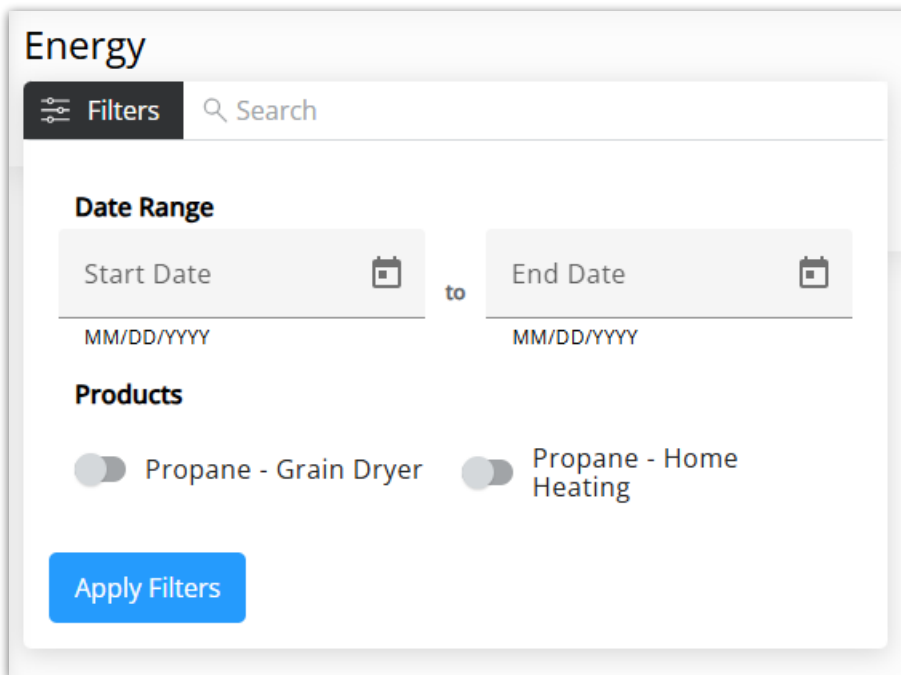

The screenshot shows the 'Energy' menu in Grower360. The left sidebar contains navigation options: Overview, Resources, Bookings, Blend Tickets, Delivery Tickets, Invoices, Payments, Statements, Products, Fields, Patronage, and Energy. The main content area displays a table of active Energy Tanks. The table has columns for Tank Name, Last Del Product, Tank Size, Last Fill Amt, Last Fill date, Tank %, and As of date. Two tanks are listed: 'Grain Dryer' and 'Home Heat'.

Tank Name	Last Del Product	Tank Size	Last Fill Amt	Last Fill	Tank %	As of
Grain Dryer	Propane - Grain Dryer	1000 gal	50 gal	09/18/2024	70%	09/18/2024
Home Heat	Propane - Home Heating	800 gal	0 gal	11/09/2024	85%	11/09/2024

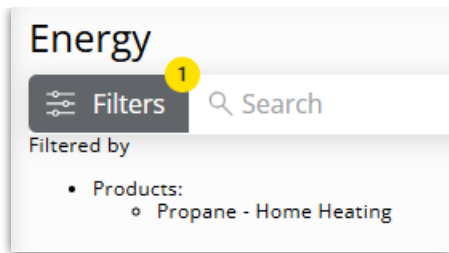

Below the table, it says 'No More Results'.

Tanks can be filtered by selecting **Filters** to the left of the *Search* field. Selecting **Filters** displays options to filter tanks by *Date Range* (which is the *Last Fill* date) or *Products*. Tanks can also be searched by the Tank name or *Product*.

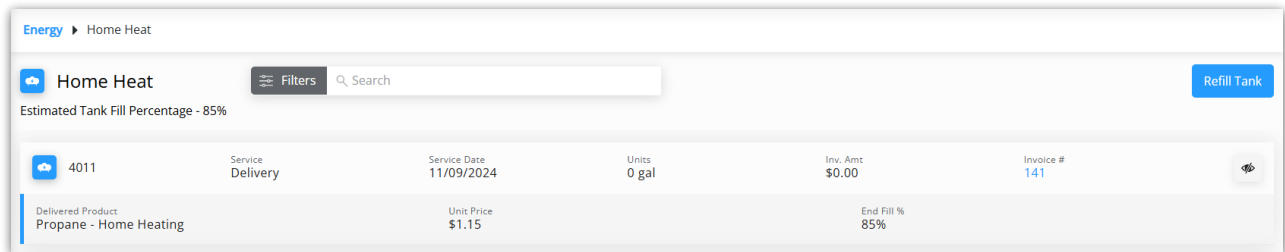

The screenshot shows the 'Energy Filters' dialog box. It has a 'Filters' button and a 'Search' field. Below the search field, there are two sections: 'Date Range' and 'Products'. The 'Date Range' section has 'Start Date' and 'End Date' fields, both with calendar icons, and a 'to' separator. Below the date fields are the placeholders 'MM/DD/YYYY'. The 'Products' section has two toggle switches: 'Propane - Grain Dryer' and 'Propane - Home Heating'. At the bottom of the dialog is a blue 'Apply Filters' button.

The filters selected display below the **Filters** button.

To view Energy tickets associated with a Tank, select the Tank from the list. Each Energy ticket associated with that Tank displays, including the *Service type*, *Service Date*, *Units*, *Inv. Amt*, and *Invoice #*. Select the **Expand** icon to view the *Delivered Product*, *Unit Price*, and *End Fill %*.

The *Estimated Tank Fill Percentage* displays at the top of the page. These tickets can also be filtered by choosing **Filters** and selecting a *Start* and *End Date*. Additionally, tickets can be searched by the associated Energy ticket # or the *Invoice #*.

Navigate back to the Energy Tank listing by selecting *Energy* from the breadcrumbs at the top of the page.
